Modern Expressing Machines of Revolutionary Youth

<< Back

This heavy industrial metal project is the brainchild of producer and sounddesigner Marc Urselli who has started this project in Italy , but is currently residing in America . The title of this debut album with D-Trash records reflects the philosophy of the band. Together with musicians from the bands Huneral Oration and Aborym a line-up was formed and this album was created. In 1999 the project was disbanded and the material seemed to be lost. In 2008 Marc Urselli however found the material recorded in the '90s back and plosihed it in his New York studio. Thus it happened that in the music of this project one can clearly hear the industrial influences from the 90's. Fans of Godflesh, Young Gods, Fear Factory or even Current 93 will find the sound of this project familiar. The problem however is that the song material is not exactly good. The pretensions are much bigger than the actual result. This makes this album not recommended.

Band: M.E.M.O.R.Y. Lab, The(int)

Label: D-Trash Records

Genre: crossover (industrial crossover / J-rock / prog / rock / metal / punk / grind)

Type: cd

Grade: 5

Review
